

Beacon Rental information

The cost of the beacon hire is \$10 per day (minimum of 4 days) or \$50 per week. The bond on the beacon is \$645, but this is only charged to your credit card IF you fail to return the beacon.

The following are the things we will need to know in order to provide the beacon to you, book it out and take care of you. As the beacon is registered to MapWorld, we need all this information in case you need to activate the beacon and Search and Rescue need to look for you:

1. The contact phone numbers of three people (who aren't on the trip)
2. The locations where the beacon could be activated (ie Arthur's Pass)
3. The number of people in your party
4. Your own postal address and credit card details

The beacons we hire are the GME Accusat MT410G 406 beacons with an accuracy of around 50 metres. They are waterproof and they float. The instructions for activation are on the back of the beacon, so it's really easy to activate them in an emergency.

If you need us to send the beacon to you, then we would be pleased to do so, but this will add to the number of days you would have the beacon as well as a delivery and retrieval cost.

Please confirm your booking as soon as possible. We would need your contact and credit card details to secure the booking.
